## **Labor Shed Analysis**

A labor shed analysis is defined as where workers work and where workers live relative to a user-defined selection area. This analysis helps to determine where a labor market draws its commuting workers. Labor shed studies can draw comparisons between various geographies including state, Congressional District, Metropolitan Statistical Area (MSA), county, Workforce Investment Area (WIA), Zip Code, and Census tract. By indicating how many of the selection area workers work outside the area, labor sheds can help identify potential pools of workers who would be available for work in the user-defined area.

Labor shed studies provide economic developers and existing or prospective employers a tool to understand the local labor market and make informed expansion and site selection decisions. In addition, labor shed studies can help indicate potential impacts from environmental, social, or economic incidents.

## **OnTheMap, Census Bureau**

OnTheMap is a mapping and reporting tool developed by the U.S. Census Bureau showing employment and home locations of workers with companion reports for user-defined areas. It is the first synthetic data product released by the Census Bureau. OnTheMap is an important tool for Florida to perform labor inflow/outflow analyses and provide commuting data to planning and economic development agencies as well as Regional Workforce Boards. OnTheMap data is also used by the Department of Economic Opportunity to help quantify natural disaster impacts for emergency management agencies based on where workers live and where they work.

OnTheMap integrates existing data from state-supplied administrative records on workers and employers with existing federal censuses, surveys, and other administrative records. The state Labor Market Information (LMI) agencies supply key data from unemployment wage records and from businesses each quarter. The Census Bureau merges the state-supplied data with current demographic information to produce the data found in OnTheMap. By combining data from different administrative sources, censuses, and surveys, the Census Bureau produces local employment information that was not previously available.

## **Florida Department of Economic Opportunity, Bureau of Workforce Statistics and Economic Research (WSER)**

The Florida Department of Economic Opportunity, Bureau of Workforce Statistics and Economic Research (WSER), produces, analyzes, and distributes labor statistics to improve economic decision making. These data are produced as part of the federal/state cooperative statistical program with the U.S. Department of Labor, Bureau of Labor Statistics, and the Employment and Training Administration.

## **Executive Summary**

The analysis of workforce and demographic characteristics, including commuting patterns of Brevard County was conducted to provide economic data on the population and labor force living or working in the county. The report is useful for detailing where workers work and live in order to align resources. This report includes population, labor force, and demographics for Brevard County.

Workers employed in Brevard County are clustered in the Health Care and Social Assistance (15.1%), and Manufacturing (13.4%) industries. Workers living in Brevard County are concentrated in the Health Care and Social Assistance (14.1%), and Manufacturing (11.6%) industries.

A detailed examination of commuting patterns for Brevard County shows that the county has a net outflow of -20,938 workers. Using the latest annual Census data available, there were 205,117 workers employed in Brevard County and 226,055 workers living in Brevard County. Of the workers who lived in the county, 75,116 workers (33.2%) were employed outside the county.

With 33.2% of workers who reside in Brevard County employed outside the county, Brevard County was ranked 59 of 67 for the highest outflow rankings among Florida counties. Miami-Dade County (21.4%) had the lowest outflow rate, followed by Leon County (21.6%) and Duval County (25.0%). Glades County (84.5%), Jefferson County (81.6%), and Union County (80.3%) had the highest worker outflow rates.

Of the 75,116 Brevard County workers employed outside the county, the top destination counties are Orange County (20,551 workers), Hillsborough County (5,131 workers), and Seminole County (4,756 workers). Of the 54,178 Brevard County workers living outside the county, the top origin counties are Orange County (8,659 workers), Osceola County (4,006 workers), and Volusia County (3,990 workers).
